Program Administrator requests list of credit-generating items from Credit Generators

Credit Generators submit eligible items

Program Administrator confirms eligibility and quantifies VMT reduction for each submitted item

If Program Administrator/Credit Generator have questions, issues are resolved before credit generating item is eligible for inclusion in Program

Credit User generates a VMT impact and determines need to mitigate that impacts

Credit Users apply to purchase credits to mitigate impacts

Application is reviewed and if approved by Program Administrator, Credit User pays for specific credit-generating item

Program Administrator allocates funds back to Credit Generator who submitted the specific credit-generating item

If application is not approved, Credit User may update application or determine appropriate next steps in consultation with Program Administrator
